Destroying rainforest for economic gain is like burning a Renaissance painting to cook a meal. - E. O. Wilson

Edward Osborne Wilson, born on 10th June 1929, is an American biologist, researcher, theorist, naturalist and author. His biological specialty is **myrmecology**, **the study of ants**, on which he is the world's leading expert. Wilson has been called "**the father of socio-biology**" and "**the father of biodiversity**". Among his greatest contributions to ecological theory is the theory of **island biogeography**, which he developed in collaboration with the mathematical ecologist **Robert MacArthur**, which was the foundation of the development of conservation area design, as well as the **unified neutral theory of biodiversity** of **Stephen Hubbell**.

Student Office Bearers
